

Easynet Benefits

► **Full Coverage**
Easynet guarantees the perfect coverage of the bale.

► **Carry Handles**
Waterproof sealed integrated packaging to protect the net roll and the core from rain and humidity, with 2 reinforced handles.

► **UV protection**
Easynet has double UV-protection: longer life and reliable performance over time.

► **Red end Warning**
Every roll has a red 70-meter end-of-roll warning. The operator can therefore plan for the roll change, thus preventing expensive machine down-time.

► **Left Right Indicator**
The mark on the cardboard core enables you to identify both right and left sides of the bale - a great help when handling and unwrapping it.

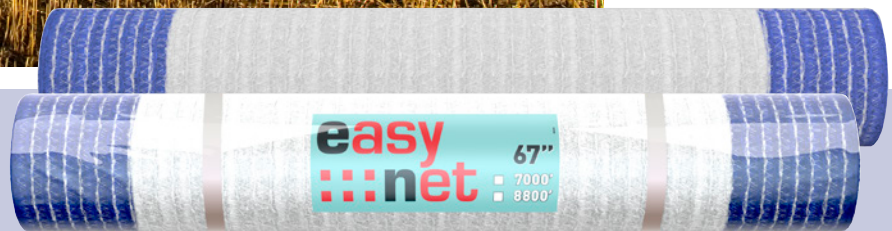

Easynet® is the latest-generation lightweight-net wrap and represents a significant qualitative increase for mid-range nets. Easynet® has a very high specific strength. It means that its chains are very strong despite they allow a reduction in the total amount of plastic.

Easynet

- UV Protection
- Left/Right Indication on Cardboard Core
- Red End Warning
- Less Waste with Longer Roll Lengths (Up to 40% Waste Savings)

Easynet reduces the amount of plastic use.
